SUMMARY

As a Front-End Developer, I specialize in creating dynamic, responsive, and user-friendly web applications. My expertise lies in front-end technologies, with a strong focus on delivering seamless and engaging user experiences.

During my internship at Gubloo Technologies, I worked on designing and implementing innovative projects, honing my skills in clean, efficient coding, problem-solving, and collaborative development. I am passionate about leveraging modern tools and technologies to build impactful digital solutions and am eager to contribute to

EXPERIENCE

Aug 2022 - Sep 2022

Gubloo Technologies Pvt Ltd, Islamabad

Frontend Developer Internship

As a Full Stack Developer I Collaborated with the Project Manager and cross-functional teams on diverse projects to ensure timely delivery, optimized outcomes, and maintained high code quality standards. Actively contributed to designing and implementing user interfaces, enhancing website functionality, and significantly improving overall user experience and performance.

SKILLS

- JavaScript
- React Js
- Rest API
- Node Js
- Git & GitHub
- Tailwind CSS
- Next Js
- Redux
- C#
- MySql

PROJECTS

Career Counselling Application:

Overview: In my final year project, I developed a comprehensive career counseling platform that allows domain experts to upload instructional videos and resources. Implemented a quiz feature for students to identify their career interests and receive personalized video recommendations. Designed and integrated a teacher dashboard for reviewing and evaluating expert video content, as well as assigning approved materials to students. Facilitated user management by enabling schools to add teachers and students to the platform, and incorporated a feedback and rating system to ensure continuous improvement in the quality of video content.

Techs: React Js, .NET framework, CSS, My Sql

Rent A Car System

Overview:As semester project,I developed a robust web application for managing car rentals, providing comprehensive functionality for handling car inventory and customer details efficiently. The application included features to track the rental history of customers, allowing administrators to view which cars were rented, the rental duration, and calculate any applicable fines for late returns. Additionally, the system automated the billing process upon car return and updated car availability in real-time, ensuring seamless management of the rental process. This project demonstrated my ability to design and implement user-centric solutions that streamline operations and enhance administrative efficiency.

Techs: ASP.NET Web Application Form, My Sql

Tech Mart

Overview:As practice project,I developed a dynamic e-commerce web application for browsing and purchasing mobile phones. The platform features a product catalog with detailed phone specifications displayed on individual pages. Users can add items to the cart, view total price calculations, and purchase multiple phones of the same or different brands. The project demonstrates expertise in building responsive interfaces and implementing seamless cart and checkout functionalities for an optimal user experience..

Techs: React Js, Context API,HTML5,CSS3

EDUCATION

Aug 2020-jun 2024	PMAS Arid Agriculture University Rawalpindi Bachelors In Computer Science Cumulative CGPA : 3.30
Aug 2018-May 2020	Harvard Collage of Commerce and Science(HCCS) Pre-Engineering Grade:A
